TECHNICAL ARSENAL

Operating Systems & Hypervisors

Proxmox VE Debian Ubuntu
Windows Server TrueNAS

VCS, Containers & Orchestration

Git Docker Kubernetes Helm

Configuration Management & CI/CD

Ansible Terraform GitLab
GitHub Actions Jenkins

Networking & Security

OPNSense Traefik Cloudflare
WireGuard Tailscale OpenVPN
Authentik Vaultwarden VLANs

Storage, Backups & Databases

PostgreSQL MongoDB Redis

Monitoring & Observability

Prometheus Grafana InfluxDB

Languages

Go Python Bash YML YAML

SOFT SKILLS

Advocating for **Developer Experience (DevEx)** by seamlessly bridging the Dev-to-Ops gap. Highly analytical with an obsessive attention to detail, taking **end-to-end ownership** of platform reliability. Organized communicator, adept at **technical documentation**, and thriving in cross-functional teams.

LINGUISTIC SKILLS

Greek	Native	●●●●●●
English	Fluent	●●●●●●
German	Intermediate	●●●●●●

Experience

96 High Military Command (Hellenic Armed Forces)

Information Systems Consultant & IT Specialist

Chios, Greece

Feb 2026 – Aug 2026

- Administered a **Windows Server** infrastructure for 1.000+ personnel, enforcing strict security and data policies.
- Deployed a disaster recovery architecture using **Veeam** for automated backups from **VMware ESXi** to **TrueNAS**.
- Provided Tier 1/2 support and optimized **LAN** switches, routers, and edge network-ing hardware.

Fogus Innovations & Services P.C.

DevOps Engineer

Athens, Greece

Jun 2023 – Jan 2026

- Architected a bare-metal private cloud, leading hardware research, capacity plan-ning, and end-to-end lifecycle management.
- Engineered cohesive platform operations across network, systems, and DevOps domains, optimizing Layer 2/3 topologies and automating workflows via **Ansible**, **Bash**, and **Python**.
- Containerized core applications and orchestrated highly-available microservice ar-chitectures using **Docker** and **Kubernetes**.
- Implemented full-stack observability via **Prometheus** and **Grafana** to monitor telemetry and ensure platform reliability.

Upstream S.A.

DevOps Engineer Intern

Athens, Greece

May 2022 – May 2023

- Saved 30 mins/day of manual overhead by developing a **Python** automation tool for campaign draw integrity checking.
- Reduced UI loading times by 94% (4m to 15s) by optimizing database querying and monitoring performance.
- Executed a complex observability migration from Tableau to **Grafana**, deploying via **Helm** with the **Prometheus** Postgres exporter.

Technical Projects

Homelab Infrastructure as Code (IaC) | Proxmox, Docker, Terraform, Ansible

- Engineered a declarative on-premise pipeline utilizing **Terraform** and **Ansible** to automate **Proxmox VE** VM/LXC provisioning and configuration.
- Bootstraps and configures fresh VMs and LXCs, handling system setup, user cre-ation, SSH key distribution, Docker runtimes, and TrueNAS storage integration, while serving as the configuration engine for ongoing system updates.
- Segmented network topology via **OPNSense VLANs** (Management, Prod, DMZ, IoT), and orchestrated zero-trust remote access using **Tailscale** ACLs and **Wire-Guard** VPN mesh.

Cloud-Native 5G Core with Service Mesh | Kubernetes, Istio, Python, Open5GS

- Architected a 5G Core testbed by deploying **Open5GS** & **UERANSIM** on **Kuber-netes**, building a **Python** anomaly framework that mitigated DDoS floods and cut signaling traffic by ~50%.
- Evaluated **cost & energy optimization** by quantifying the power overhead of **Istio Service Mesh** (mTLS, L7 routing) using **eBPF-based Kepler** metrics.

High-Performance Go Movie Recommender Engine | Go, Big Data Algorithms

- Engineered a highly concurrent recommendation engine in **Go** utilizing **Goroutines** to process the **MovieLens** dataset with minimal memory footprint.
- Developed a hybrid collaborative filtering pipeline, utilizing Jaccard, Dice, Cosine & Pearson correlation matrix computations to power my recommender engine.

Education

National and Kapodistrian University of Athens

MSc in Computer, Telecommunications & Network Engineering.

Athens, Greece

Oct 2023 – Oct 2025

Thesis: Assessing the Energy and Resilience Trade-offs of Service Mesh Integration and DDoS Mitigation in a Cloud-Native 5G Environment.

National and Kapodistrian University of Athens

BSc in Informatics & Telecommunications

Athens, Greece

Oct 2017 – Jul 2022

Thesis: Performance analysis of LoRa and LoRaWAN communications.
